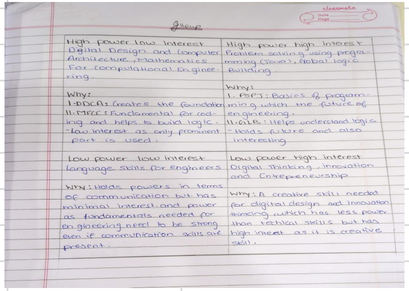
POWER INTEREST MATRIX



Group

High power low interest Digital Design and Computer Architecture, Mathematics For Computational Engineering. Why: 1. DDCA: Creates the foundation 11. MFCE: Fundamental for coding and helps to build logic. - Low interest as only prominent part is used.	High power high interest Problem solving using programming (Java), Global logic Building. Why: 1. PSPJ: Basics of programming which the future of engineering. 11. GLB: Helps understand logic - Holds future and also interesting
Low power low interest Language skills for engineers Why: Holds powers in terms of communication but has minimal interest. and power as fundamentals needed for engineering need to be strong even if communication skills are present.	Low power high interest Digital Thinking, innovation and Entrepreneurship Why: A creative skill needed for digital design and innovation thinking, which has less power than techical skills but has high interest as it is creative skill.

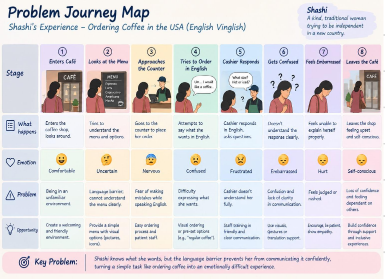
SRIDEVI USER JOURNEY



Problem Journey Map

Shashi's Experience – Ordering Coffee in the USA (English Vinglish)

Shashi
A kind, traditional woman trying to be independent in a new country.

Stage	① Enters Café	② Looks at the Menu	③ Approaches the Counter	④ Tries to Order in English	⑤ Cashier Responds	⑥ Gets Confused	⑦ Feels Embarrassed	⑧ Leaves the Café
What happens	Enters the coffee shop, looks around.	Tries to understand the menu and options.	Goes to the counter to place her order.	Attempts to say what she wants in English.	Cashier responds in English, asks questions.	Doesn't understand the response clearly.	Feels unable to explain herself properly.	Leaves the shop feeling upset and self-conscious.
Emotion	😀 Comfortable	🤔 Uncertain	😰 Nervous	😟 Confused	😣 Frustrated	😔 Embarrassed	😞 Hurt	😞 Self-conscious
Problem	Being in an unfamiliar environment.	Language barrier; cannot understand the menu clearly.	Fear of making mistakes while speaking English.	Difficulty expressing what she wants.	Cashier doesn't understand her fully.	Confusion and lack of clarity in communication.	Feels judged or rushed.	Loss of confidence and feeling dependent on others.
Opportunity	Create a welcoming and friendly environment.	Provide a simple menu with visual options (pictures, icons).	Easy ordering process and patient staff.	Visual ordering or pre-set options (e.g., "regular coffee").	Staff training in friendly and clear communication.	Use visuals, Gestures or translation support.	Encourage, be patient, show empathy.	Build confidence through support and inclusive experiences.

Key Problem: Shashi knows what she wants, but the language barrier prevents her from communicating it confidently, turning a simple task like ordering coffee into an emotionally difficult experience.

CAFÉ
MENU
Espresso
Latte
Cappuccino
Americano
Mocha
Um... I would like a coffee..
What size? Hot or iced?

Hydraulic Powered Robotic Arm
(Using Cardboard)

Syringe 2
(Elbow movement)
Syringe 3
(Wrist movement)
Syringe 1
(Base/Shoulder movement)
Syringe 4
(Gripper open/close)
Base
(rotates)
Control Syringes
(You push these)
Syringe 1
(Base/Shoulder)
Syringe 2
(Elbow)
Syringe 3
(Wrist)
Syringe 4
(Gripper)

Working Principle :
When we push the control syringe, the water pressure is transmitted through the tube to the syringe on the arm, which moves and creates the desired motion.

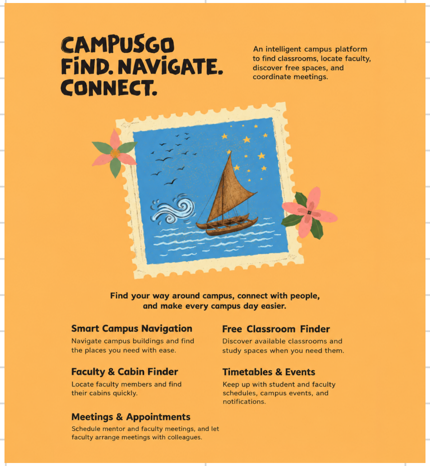
POSTER



CAMPUSGO
FIND. NAVIGATE.
CONNECT.

An intelligent campus platform to find classrooms, locate faculty, discover free spaces, and coordinate meetings.

Find your way around campus, connect with people, and make every campus day easier.

Smart Campus Navigation
Navigate campus buildings and find the places you need with ease.

Free Classroom Finder
Discover available classrooms and study spaces when you need them.

Faculty & Cabin Finder
Locate faculty members and find their cabins quickly.

Timetables & Events
Keep up with student and faculty schedules, campus events, and notifications.

Meetings & Appointments
Schedule mentor and faculty meetings, and let faculty arrange meetings with colleagues.
